ABOUT ME

Frontend developer looking for new opportunities. Worked with the development of internal and commercial projects. Created technical documentation for the project, trained and explained the project to new team members, pitched own ideas for product development, and built all project features. I am an energetic, ambitious and persistent person who never stops and I am currently practicing with React to expand my knowledge. I quickly absorb information and understand the concept of deadlines. I believe that my knowledge, my desire and experience will fully satisfy your requirements.

EXPERIENCE

May 2023 - July 2023
jellyworkz/sni

Frontend Developer

About project: An Israeli startup that collects certain information from all social networks on the mentioned business. Analyzes and issues business statistics. Description: Change design and write or rewrite JavaScript/TypeScript, creating new projects, pages, architectures, writing custom: services, pipes, modal windows, Mobile responsive, working with charts, bug fixing.

May 2022 - March 2023
Vakoms

Frontend Developer

About project: Swiss solution project for the "Smart Home". Remote management and control of devices throughout the house based on IoT technology. My task on the project was to receive all data from the backend and display them in the application in the form of graphs and tables. For this application, I wrote an Admin page for this project where the administrator could add or delete data. Description: Change design and write or rewrite JavaScript/TypeScript, creating new projects, pages, architectures, writing custom: services, pipes, modal windows, Iframe plugins, mobile responsive, working with charts, bug fixing

November 2021 - May 2023
Vakoms

Frontend Developer

About project: Several web sites (service), with ability to configure and buy 2D/3D models of furniture. Plugin iframe in customer site. Platform that speeds up the whole process of furniture configuration and selling. It simplifies the process of ordering and selling furniture by using interactive 3D and AR technologies. Platform allows you to change colors in real time, materials, add or remove furniture elements and get the price instantly. Description: Change design and write or rewrite JavaScript/TypeScript, creating new projects, pages, architectures, writing custom: services, pipes, modal windows, Iframe plugins, mobile responsive, working with Unity (WebGL), bug fixing
